ENVIRONMENTAL POLICY

Teesside Precision Engineering Ltd recognises its responsibilities to environmental protection and is committed to achieving best environmental practice throughout its business activities. Environmental management at Teesside Precision Engineering Ltd is based upon continuous improvement consistent with current knowledge and the requirements of ISO 14001:2004.

With regard to its overall environmental objectives and targets, Teesside Precision Engineering Ltd will:

- Implement environmentally sound 'best practice' techniques where possible.
- To comply fully with all statutory regulations applicable to the company and its operation and where reasonably practicable, exceed these standards.
- Develop management processes and operational procedures whose functions are to prevent pollution and improve and manage environmental performance.
- Reduce the consumption of raw materials, minimise the use of environmentally sensitive materials and promote the use of recycled materials, wherever possible.
- Ensure all waste is managed and disposed of in an environmentally acceptable manner and, to take all reasonable practicable measures to minimise the production of waste.
- Conduct on-site audits to ensure operations are compliant with environmental requirements.
- Provide appropriate levels of training and support to personnel to ensure they are able to carry out their tasks in an environmentally sound manner.
- Make the environmental policy available to the public and all members of staff.
- Ensure appropriate resources are available to fully implement the environmental policy and continuously review the policy's relevance with respect to legal and business developments.
